Open Analytics

Job Opening Infrastructure Engineer

Profile

OpenAnalytics is an international company based in Antwerp (Belgium) providing data analysis services and products across geographies and industrial sectors. We are looking to expand our infrastructure team with a candidate who fits the following profile:

- MSc in Computer Science interested to work on data science infrastructure and systems

- team player and good communicator with fluency in English, verbal and written

- strong experience in open source technology and operating systems; knowledge of devops and public clouds (AWS, Azure, Google Cloud)

- sound knowledge of a scripting language (Python, bash…)

Description

The successful candidate will

- interact with data scientists and software engineers in order to design, operate and secure open source platforms and infrastructure for data science

- set up, maintain and advise on such infrastructure on behalf of our customers

- translate modern devops approaches to the data science field and collaborate with Open Analytics colleagues on the infrastructural aspects of their projects

Offer

We offer

- a pleasant and challenging environment in which each person can develop their talents

- opportunities to work on exciting problems at the edge of current knowledge and at the forefront of system administration technologies

- competitive remuneration package and benefits in line with skills and experience

Applications and inquiries regarding the position can be sent to careers@openanalytics.eu.
